

AUDITOR'S REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders and the Board of Directors of Thai Solar Energy Public Company Limited

I have reviewed the accompanying consolidated and company statement of financial position as at 31 March 2015, the related consolidated and company statements of comprehensive income, changes in shareholders' equity, and cash flows for the three-month period then ended, and condensed notes to interim financial information of Thai Solar Energy Public Company Limited and its subsidiaries, and of Thai Solar Energy Public Company Limited, respectively. Management is responsible for the preparation and presentation of this interim financial information in accordance with Thai Accounting Standard 34, "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my review.

Scope of review

I conducted my review in accordance with Thai Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity". A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Thai Standards on Auditing and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my review, nothing has come to my attention that causes me to believe that the interim financial information is not prepared, in all material respects, in accordance with Thai Accounting Standard 34, "Interim Financial Reporting".

Emphasis of Matter

I draw attention to Note 4 to the interim financial information which describes the effects on the financial statements for the year ended 31 December 2014 and financial information for the three-month period ended 31 March 2014 due to the change in accounting policy regarding investment in associates and joint ventures, which requires the Company to apply the equity method to recognise an investment in jointly controlled entities. My conclusion is not qualified in respect of this matter.

2 Accounting policies

2.1 Basis of preparation

This interim consolidated and company financial information was prepared in accordance with Thai generally accepted accounting principles under the Accounting Act B.E. 2543, being those Thai Accounting Standards issued under the Accounting Professions Act B.E. 2547, and the financial reporting requirements of the Securities and Exchange Commission. The primary financial information (i.e. statements of financial position, statements of comprehensive income, changes in shareholders’ equity and cash flows) are prepared in the full format as required by the Securities and Exchange Commission. The notes to the financial information are prepared in a condensed format according to Thai Accounting Standard 34 (revised 2012), ‘Interim Financial Reporting’ and additional notes are presented as required by the Securities and Exchange Commission under the Securities and Exchange Act.

The interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2014.

An English version of the interim consolidated and company financial information has been prepared from the interim financial information that is in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language interim financial information shall prevail.

The accounting policies used in the preparation of the interim financial information are consistent with those used in the annual financial statements for the year ended 31 December 2014 except as described in note 4.

Costs that are incurred unevenly during the financial year are anticipated or deferred in the interim report only if it would also be appropriate to anticipate or defer such costs at the end of the financial year.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual profit or loss.

2.2 Revised accounting standards, revised financial reporting standards, and related interpretations

New financial reporting standards and revised accounting standards, revised financial reporting standards are effective on 1 January 2015. These standards are relevant to the group.

a) Financial reporting standards, which have a significant impact to the group:

TAS 1 (revised 2014)	Presentation of financial statements
TAS 19 (revised 2014)	Employee benefits
TAS 27 (revised 2014)	Separate financial statements
TAS 28 (revised 2014)	Investments in associates and joint ventures
TAS 34 (revised 2014)	Interim financial reporting
TFRS 10	Consolidated financial statements
TFRS 12	Disclosure of interests in other entities
TFRS 13	Fair value measurement

TAS 1 (revised 2014), the main change is that a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). The amendments do not address which items are presented in OCI.

TAS 19 (revised 2014), the key changes are (a) actuarial gains and losses are renamed 'remeasurements' and will be recognised immediately in 'other comprehensive income' (OCI). Actuarial gains and losses will no longer be deferred using the corridor approach or recognised in profit or loss; and (b) past-service costs will be recognised in the period of a plan amendment; unvested benefits will no longer be spread over a future-service period. This standard has no impact to the group.

TAS 27 (revised 2014) provide the requirements relating to separate financial statements.

TAS 28 (revised 2014) provide the requirements for investment in associates and joint ventures accounted by equity method. The significant impact to the group is described in Note 4.

TAS 34 (revised 2014), the key change is the disclosure requirements for operating segment. An entity shall disclose information of a measure of total assets and liabilities for a particular reportable segment if such amounts are regularly provided to the chief operating decision maker and if there has been a material change from the amount disclosed in the last annual financial statements for that reportable segment.

TFRS 10 has a single definition of control and supersedes the principles of control and consolidation included within the original TAS 27, 'Consolidated and separate financial statements'. The standard sets out the requirements for when an entity should prepare consolidated financial statements, defines the principles of control, explains how to apply the principles of control and explains the accounting requirements for preparing consolidated financial statements. The key principle in the new standard is that control exists, and consolidation is required, only if the investor possesses power over the investee, has exposure to variable returns from its involvement with the investee and has the ability to use its power over the investee to affect its returns. This standard has no impact to the group.

TFRS 12 require entities to disclose information that helps readers of financial statements to evaluate the nature of risks and financial effects associated with the entity's interests in subsidiaries, associates, joint arrangements and unconsolidated structured entities. This standard has no impact to the group.

TFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across TFRSs. This standard has no impact to the group, except for disclosures.

3 Estimates

The preparation of interim financial information requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial information, the significant judgements made by management in applying the group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2014.

4 Change in accounting policies

Investments in associates and joint ventures

TAS 28 (revised 2014) requires for investment in associates and joint ventures to be accounted for using equity method.

The Company used the proportionate consolidated method to account for jointly controlled entities when preparing the consolidated financial statements for the year ended 31 December 2014. The Company adopted this standard on 1 January 2015 and applied the equity method for recognising an investment in jointly controlled entities by making retrospective adjustments to the financial statements for the year ended 31 December 2014 presented for comparative purposes. The effects on the financial statements for the year ended 31 December 2014 and financial information for the three-month period ended 31 March 2014 are as follows:

5 Operating segments

The Company, its subsidiaries and jointly controlled entities are principally engaged in the production and distribution of electricity generated from solar energy. Their operations are carried out only in Thailand. Segment performance is measured based on operating profit or loss, on a basis consistent with that used to measure operating profit or loss in the financial statements. As a result, all of the revenues, operating profits and assets as reflected in these financial statements pertain exclusively to the aforementioned reportable operating segment and geographical area.

6 Fair value

Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following table presents the group's financial assets that are measured at fair value at 31 March 2015.
